Get Found on Google Maps

A Quick-Start Guide to Claiming Your Storefront & Dropping an Exact Map Pin

Published: November 2026 **Version:** 1.1 (Print Handout Edition) **Guide:** Local Business Visibility

When customers search for products or services nearby, **Google Maps** is their first stop. If your business is unlisted—or pinned in the wrong spot—you are losing walk-in traffic and calls to competitors. Follow these four steps to take control of your listing in minutes.

STEP-BY-STEP: CLAIM & VERIFY YOUR LISTING

1. Locate or Add Your Business on Google Maps

SETUP

Open the **Google Maps app** on your phone (or visit *business.google.com*) signed into your business Google account. Search your business name. If it appears, tap it and select **"Claim this business."** If it does not appear, tap **"Add your business"** to create a new profile.

2. No Street Address? Drop a Pin Directly on Your Doorstep

Caribbean Pro-Tip

Many thriving shops, workshops, and offices across the Caribbean operate without formal street numbers. Instead of struggling with text addresses, tap **"Edit map location"** or **"Adjust pin"** during setup. Zoom into satellite view and drag the red marker directly onto your exact building entrance so drivers and customers navigate straight to you.

3. Complete Verification

SECURITY

Google requires quick proof that you own the business. Depending on your category, complete verification via a quick **SMS/phone code**, email, or a brief **video walkthrough** showing your storefront signage, street surroundings, and unlocking the door.

4. KEEP YOUR STOREFRONT INFORMATION UP TO DATE

Profile Section	What to Update & Why It Matters
Location & Pin	Re-center your map pin whenever you relocate or open a second branch.
Opening Hours	Set regular hours plus special holiday hours so customers never arrive to a locked door.
Phone & WhatsApp	List your active mobile/WhatsApp line for instant one-tap customer inquiries.
Storefront Photos	Upload clear exterior photos so customers immediately recognize your building.

Claim Your Free 15-Minute Google Maps Setup Check

Not sure if your business pin is accurate or verified? Message us today for a complimentary 15-minute listing check—plus learn how Boundless Tallawah Software connects your POS, inventory, and accounting workflows.
